

Erasmus Policy statement (EPS)

For MF, participation in the Erasmus Programme is a crucial part of achieving our vision and goals. The exchange and development of knowledge and ideas through mobility of students and staff, as well as larger cooperation with organisations and institutions, is in line with our institution's overall vision, which is:

MF shall be recognizable as a value-based institution at university level that emphasizes academic freedom, critical thinking and democratic participation. MF will through education and research of high international quality participate in the national and global knowledge and social development. The education at MF strives to emphasize holistic education and respond to the present and future needs of church, school, and community.

MF's main goal is to be a leading international environment for research and education within its core fields and our competence shall be internationally relevant, visible and wanted. In order to achieve this, MF will facilitate for exchange mobility of students and staff through the Erasmus Programme to become a natural and integrated part of our education programs and research. Furthermore, encourage exchange mobility of students and staff from our partners as we believe this contributes greatly to our main goal.
